PROJECTS

PAYROLL
- **ReactJs | Material UI | Axios | Mongodb | Nodejs | Expressjs |Razorpay**
- Built a Completely Responsive Payroll Website which is crud operation based and stores data about employees, thier salary,contact details,and etc.
- Built several POST,GET,DELETE api calls in the backend to perform editing,fetching and deleting the employee details. Used Razorpay payment gateway integration for payments. Github

I-NOTEBOOK
- **ReactJs | Firebase | HTML | CSS | Bootstrap | mongodb | Nodejs**
- It is cloud-based notebook application that stores data in the form of notes on the cloud. This data is independent for each individual user.
- Implemented Sign up and User Login functionality by using an API call to fetch the token required for verification and storing it in the local storage of the client side.Uses Hashing for password encryption using bcrypt.js. Github

STUDENT REGISTRATION SYSTEM
- **JDBC | MySQL**
- Built a simple UI registration model that stores data about students and manages them in a database.I learned about JDBC, databases, and SQL queries for basic CRUD operations and implemented them Github

WORDLE
- **Javascript | HTML | CSS**
- It is a popular five-letter guessing game where players have six attempts to guess a five-letter word. Worked on structuring a web page with HTML, styling with CSS, and giving a dynamic feel to the web page using JavaScript. Github
